

Fusion, *meet* acceleration.

Capgemini 

ITER Business Forum  
Marseille | 23-25 avril

## About Capgemini

Capgemini is a global business and technology transformation partner, helping organizations to accelerate their dual transition to a digital and sustainable world, while creating tangible impact for enterprises and society. With its strong over 55-year heritage, Capgemini is trusted by its clients to unlock the value of technology to address the entire breadth of their business needs. It delivers end-to-end services and solutions leveraging strengths from strategy and design to engineering, all fueled by its market leading capabilities in AI, generative AI, cloud and data, combined with its deep industry expertise and partner ecosystem. Additionally, Capgemini plays a key role in the ITER project, leveraging its technological and engineering expertise to advance fusion energy development and contribute to the global pursuit of sustainable energy solutions.

Lean more about our presence at IBF

## What awaits you : Challenges and Perspectives

Visit our booth to meet our experts and discover how we optimize engineering, commissioning and operations by unlocking the potential of both digital and physical worlds.

### **Engineering and Procurement : Acceleration and Cost Control**

Join our experts to discuss Design to X and discover how to apply this approach to facilitate integration and improve overall efficiency, thereby reducing risks and costs throughout the system's lifecycle. Learn how we can support you in ensuring the safety and efficiency of nuclear facilities by guaranteeing full compliance and optimal personnel preparation.

### **Commissioning: Optimization of On-Site Operations**

Discover how to effectively manage your operations in real-time, offering complete visibility and optimal control to maximize efficiency and responsiveness. Dive into the world of Digital Continuity and Digital Twins for seamless integration and continuous optimization throughout the systems' lifecycle, reducing risks and costs.

### **Innovations : Catalysts for Change**

Learn how to leverage AI and GenAI for large-scale projects, optimizing research and development processes to achieve ambitious goals. Explore how immersive and interactive training for engineers, scientists, and operators acts as an accelerator, facilitating the rapid acquisition of essential skills and the integration of new technologies.
